Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sellers et al (US 6,107,799).

As regards to claim 1, Sellers et al teach a magnetic resonance apparatus, including a magnetic resonance scanner unit having an examination space adapted to receive a region of an examination subject therein (figure 1; column 2, lines 1-13 and column 5, lines 16-28). Further, Sellers et al teach a gradient coil unit movable in a displacement direction atleast within the examination space, and a component of the magnetic resonance scanner unit surrounding the examination space, wherein at least one pressurizable pillow disposed between the gradient coil unit and the component, said pillow having an internal pressure that is adjustable to mechanically fix the gradient coil unit relative to the component (figure 1, numerals 10, 12, 14, 16, 20; column 2, lines 53-64; columns 5 and 6, lines 48-87 and 1-45).

As regards to claims 2-7, Sellers et al further teach the evacuatable gastight skin pillow being disposed between the gradient coil and the component, mechanically fixing the gradient coil against the component at equal or above ambient temperature (figure 1-4, numerals 10, 14, 20, 24, column 2, lines 53-67, column 6. lines 33-36).

As regards to claims 8-16, Sellers et al further teach that the pillow is connected to, and touching or glued to the cylindrical gradient coil and adjusts to the same extent as the gradient coil; the gradient coil is filled with a gas and extends within the cylindrical limits(figures 1-4, numerals 10, 12, 14, 16, 20, 22, and 24).

2. Claims 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brij B Shrivastav whose telephone number is 571-272-2250. The examiner can normally be reached on 7 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. F. Gutierrez can be reached on 571-272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
